ARP-6: Completed publication

Requirements, architecture and editable diagrams. The task shows the outcome, acceptance criteria, owner, priority, due date, state and delivery references.

ARP-14: Reviewer access

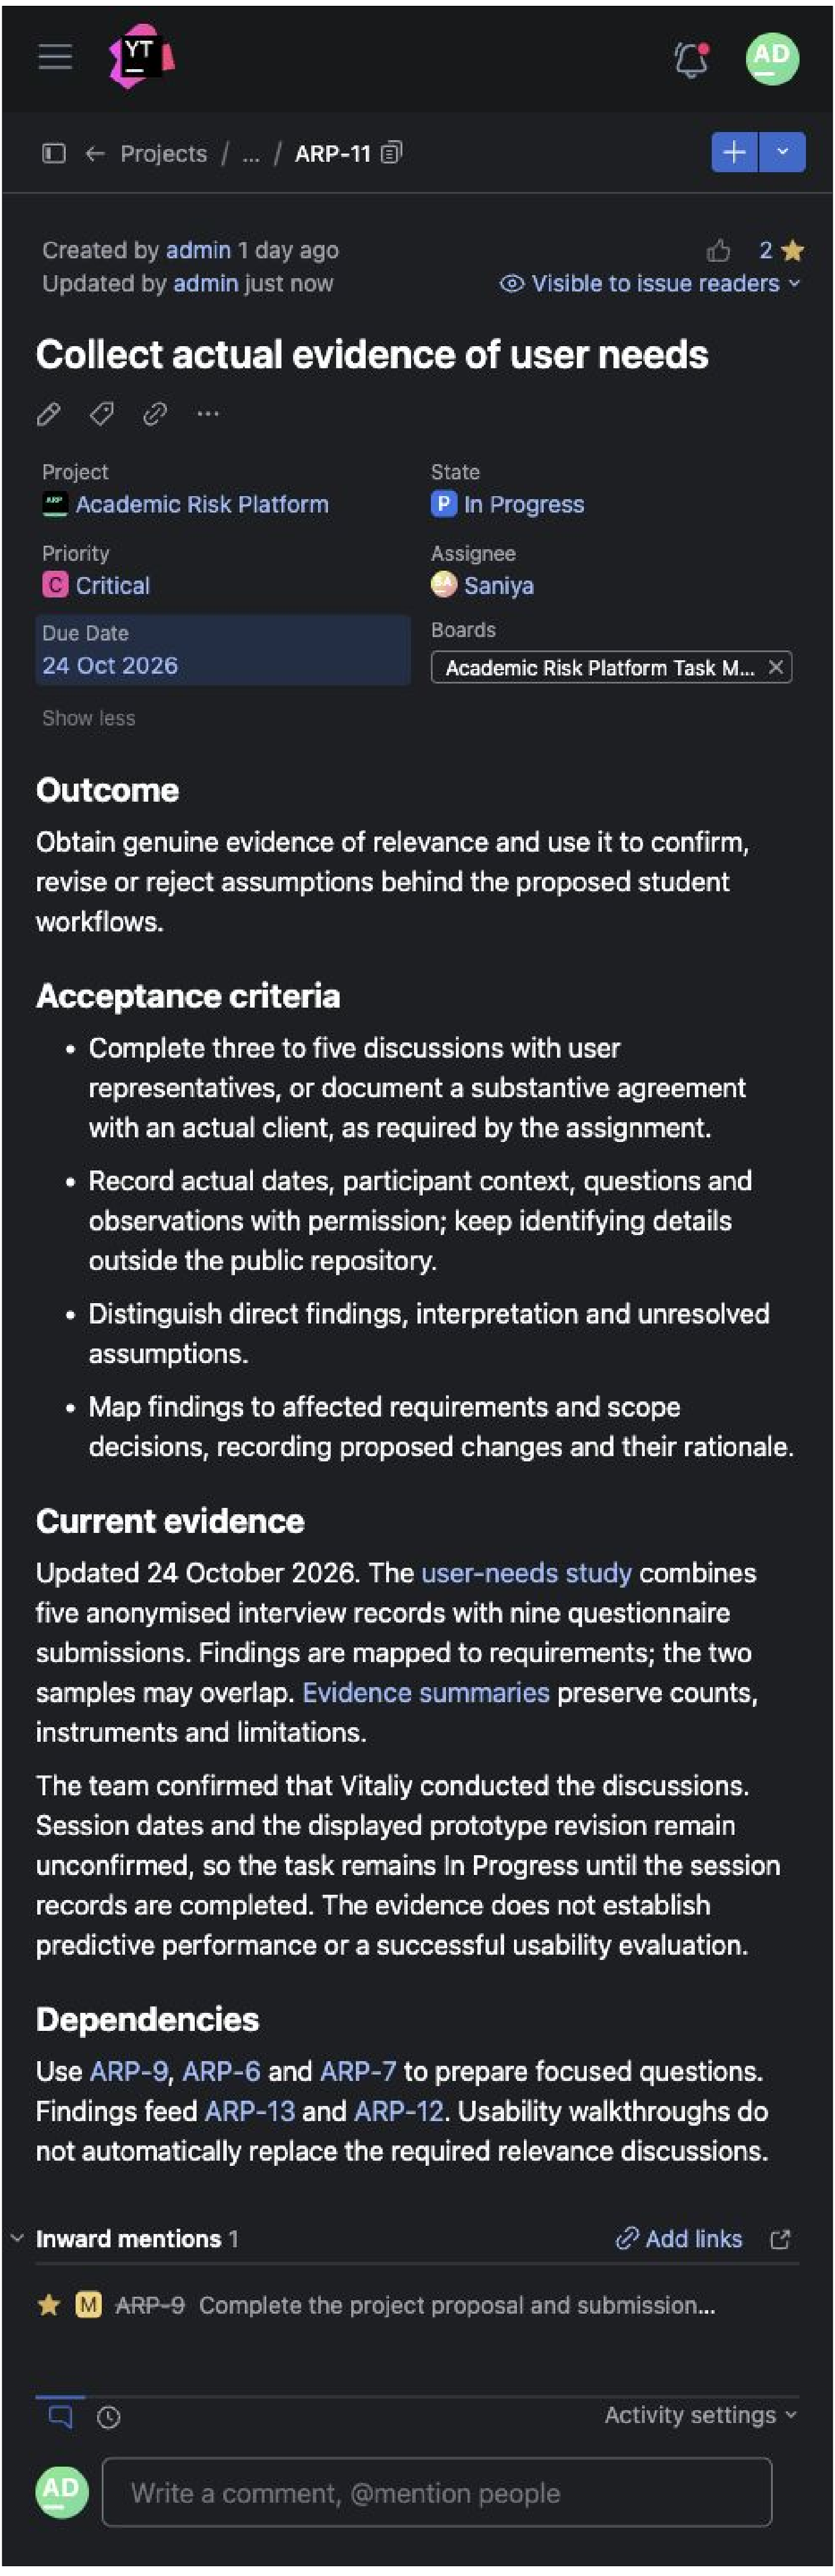

The hosted prototype, repository and supporting files were checked. The task is Done and records the verified revision, public-access checks and demonstration limits.

Open ARP-14 | *Hosted prototype* | *Merged PR #8*

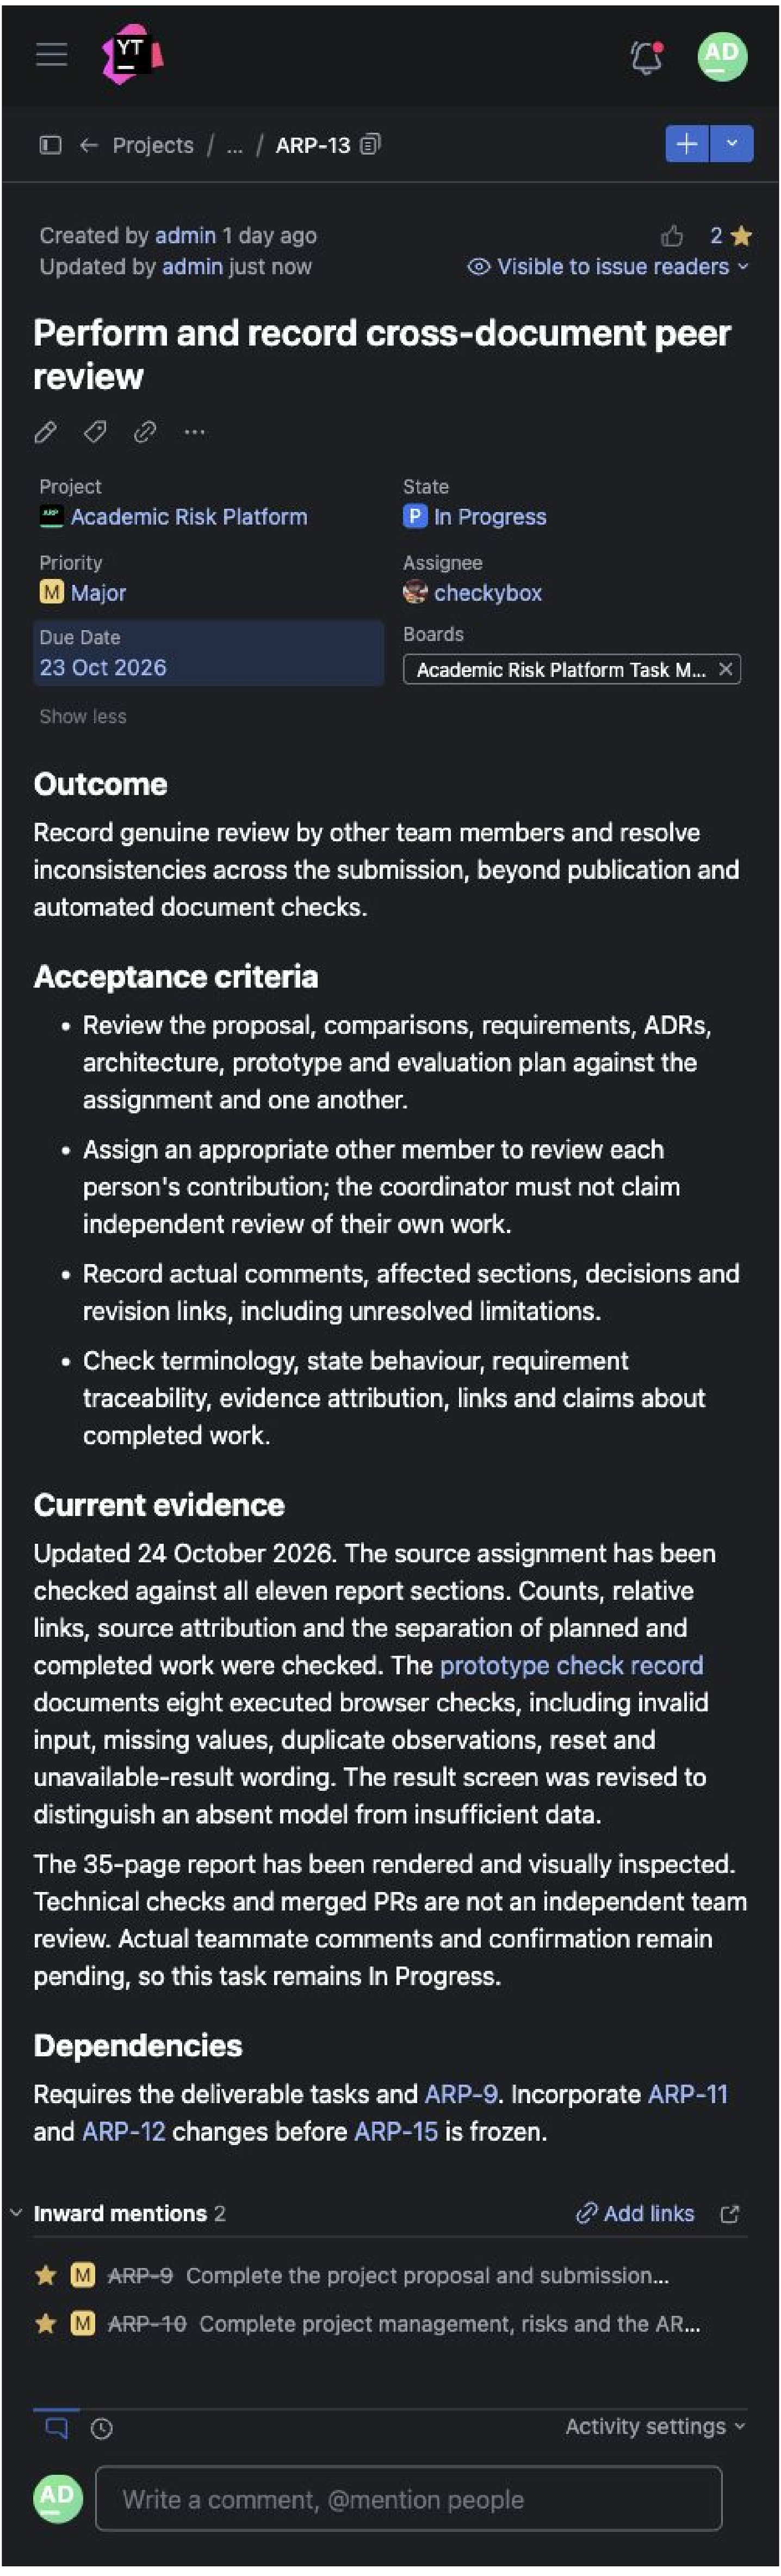

ARP-11: User-needs evidence

Five interview records and nine questionnaire submissions are documented. The task remains In Progress while session dates and the prototype revision are unconfirmed.

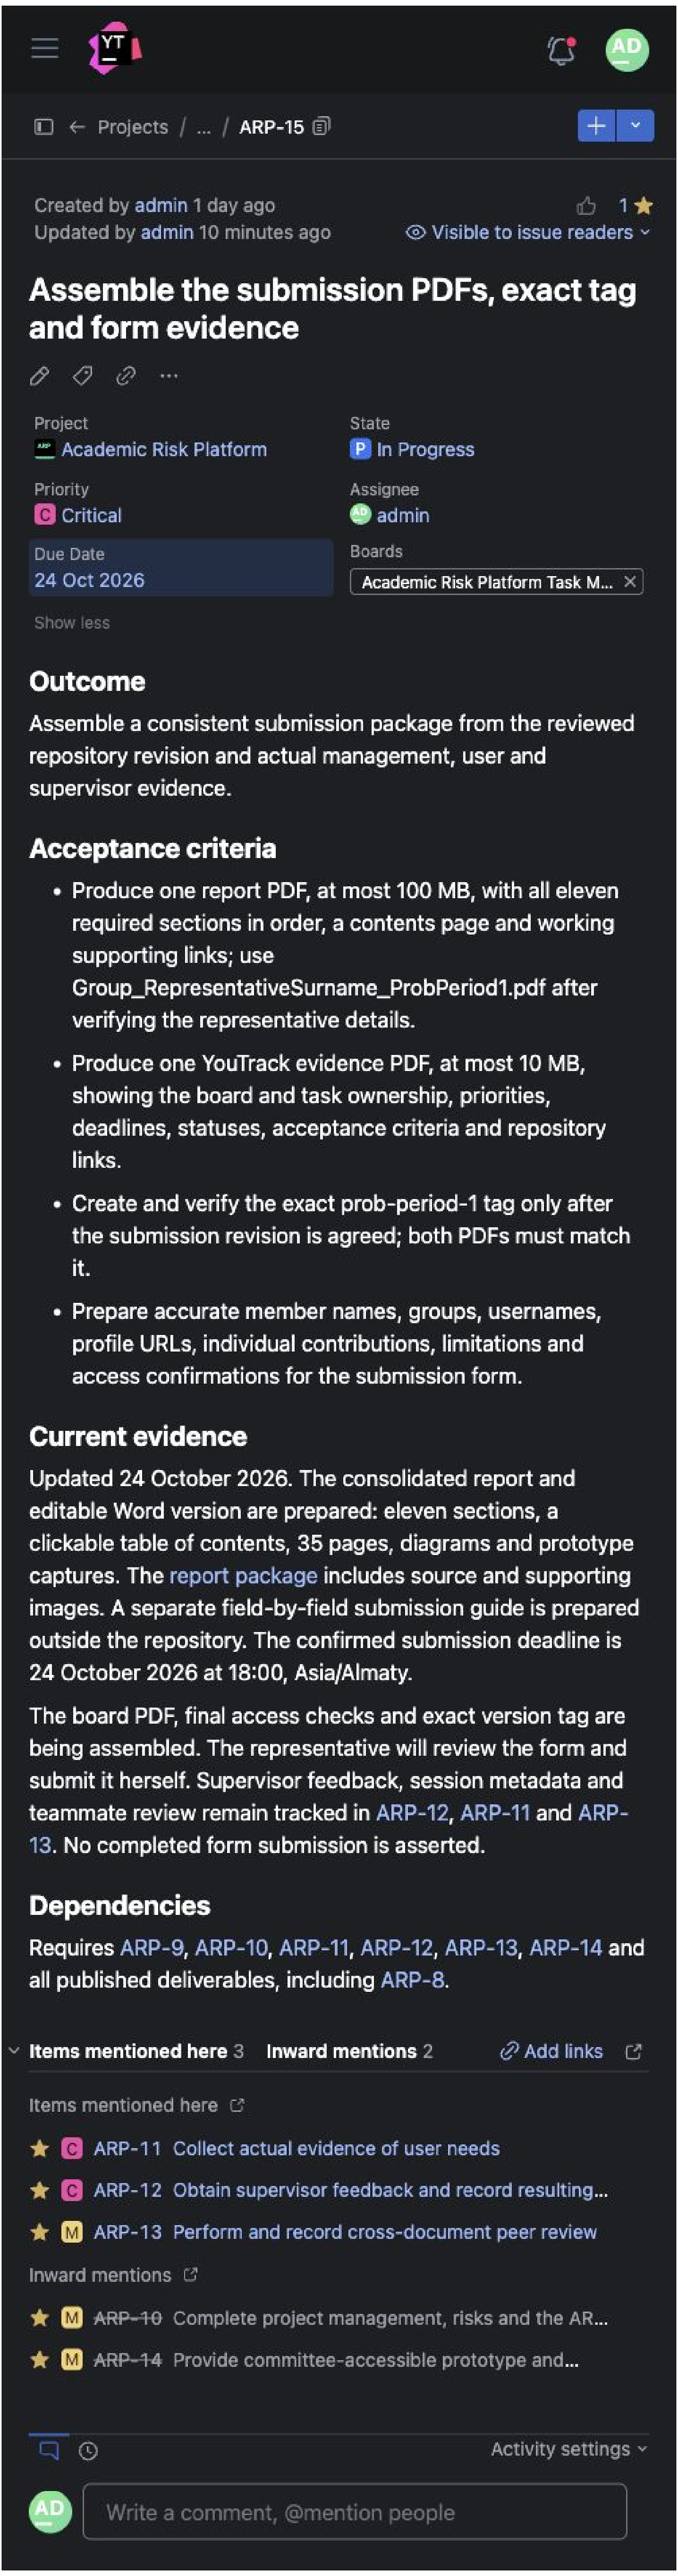

ARP-13: Review and verification

Technical checks and revisions are recorded. Team review comments and confirmation remain pending, so the task is In Progress.

ARP-15: Submission assembly

The report and supporting files are prepared. This capture records the package assembly stage before the version tag and final submission; the task remains In Progress.
